- Tap on “Install Now”

Step 8

How to do FOTA Update?

FOTA: Firmware Over The AIR

Pictorial representation of generic steps that a user needs to take to get FOTA update for Registered Devices

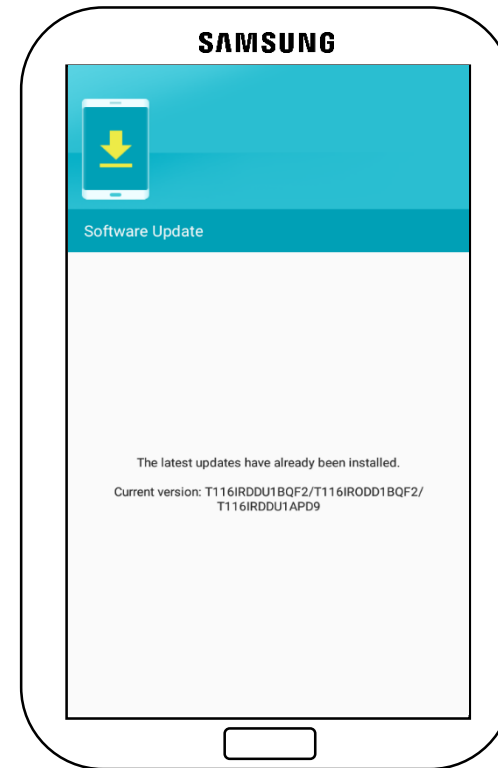

You need to update your device by following step 1 to step 8 again and again, until you get

"The latest updates have already been installed"

Current Version:

T116IRDDU1BQF2/T116IRODD1BQF2/T116IRDDU1APD9

As shown in screen to very right

If this value is **BQF2** or **BQF1**, that means device has **Registered device** binary, otherwise user needs to check for firmware update again.

Thank You
